

The Frenchman's Cove Experience

is unlike any other. It is a unique setting for a remarkable combination of conference and recreation in an unspoilt area near

Port Antonio, Jamaica

30th January - 4th February 2018

Suggested travel from London 29th January to 7th February

**Dr. Jude Currivan
will present**

**ME AND WE:
SELF, GAIA AND
THE COSMIC
HOLOGRAM**

The event will be chaired by David Lorimer
and hosted by Diana Clift

DR. JUDE CURRIVAN

Jude Currivan PhD is a cosmologist, futurist and author.

She has a Master's degree in Physics from Oxford University specialising in quantum physics and cosmology, and a PhD in Archaeology researching ancient cosmologies. She has travelled in more than 70 countries, worked with wisdom keepers from many traditions, and has been a life-long researcher into the scientific and experiential understanding of the nature of reality.

The author of six books, her latest being *The Cosmic Hologram: In-formation at the Center of Creation*, she is a member of the Evolutionary Leaders Circle, and lives in Wiltshire England.

DAVID LORIMER

David Lorimer is a writer, lecturer and editor. He is Programme Director of the Scientific and Medical Network (SMN) and editor of the Network Review, President of the Wrekin Trust, Chief Consultant of Character Education Scotland and the author and editor of over a dozen books.

David founded and runs the 'Inspire Aspire' values education programme which reaches thousands of school children throughout the Commonwealth.

DIANA CLIFT

Diana Clift is a former neurochemist turned hypnotherapist and is a vice president of the SMN. She has organised events at Frenchman's Cove since 2009 in association with the SMN and with invaluable help and support from the Weston Family.

"There is something very special about Frenchman's Cove events. The beauty and lushness of nature and the vitality of the local culture seem to catalyse new ideas and connections....with, of course, all the enjoyment of a Caribbean holiday!"

ME AND WE: SELF, GAIA AND THE COSMIC HOLOGRAM

The scientific revolution of the 20th century expanded and replaced the previous Newtonian ideas of a Universe of things and absolute space and time with interactions of energy fields, quantum probabilities and relativities.

This 20th century scientific revolution though was incomplete. Not only have quantum and relativity theories appeared incompatible, but founded on its understanding of energy-matter and space-time, 20th century science overlooked the significance of information and the nature of consciousness.

Now we are on the threshold of a 21st century scientific revolution in which information and consciousness appear to be more fundamental than energy-matter and more primary than space-time. The emerging paradigm suggests that we aren't just the creation of our Universe, but co-creative microcosms of its inherent intelligence and unified reality. We are part of a 'Cosmic Hologram'. Consciousness isn't something we have, it's what we, and our planetary home Gaia, and the Universe actually are.

Our event will interweave scientific evidence for the emergent wholeworld-view with experiential exploration of unity awareness, unified reality and nonlocal perception. As we expand our perception from the 'Me' to the 'We' of the entire Cosmos, we will immerse ourselves in the natural wonders and wisdom of Gaia in the gorgeous environment of the Caribbean.

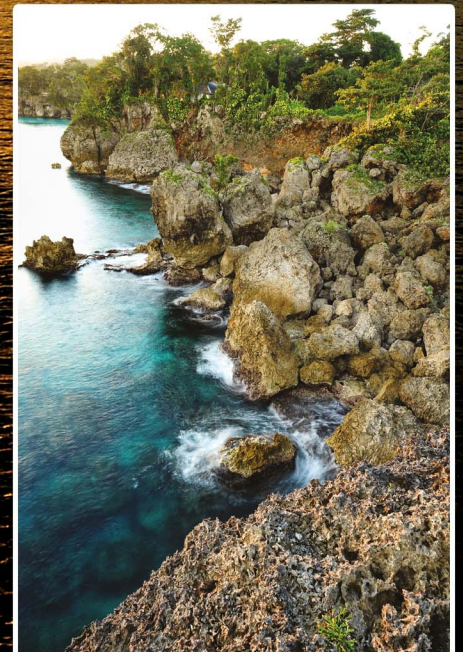

FRENCHMAN'S COVE

A private estate in an unspoilt part of the north east coast of Jamaica, it consists of 45 acres of rolling landscape with tropical trees and plants. A small river runs through the grounds down to its own sheltered white sandy beach. Dotted around the site are 17 spacious and secluded houses that sleep between two and six, plus a central building, the 'Great House', sleeping up to 24. Houses have a large sitting area, one or two bedrooms, en suite bathroom and a small kitchen. Many overlook the water and all have patios for sitting out. The weather in January is usually warm and sunny (25 degrees) with heavy showers and sea temperature is about 23 degrees.

Frenchmans Cove was a favourite of Hollywood celebrities such as Elizabeth Taylor and Richard Burton in the 1960s. Ian Fleming wrote one of the James Bond adventures here and it featured in the film Dr No, and several more recent films, such as Knight and Day. However, its present owner, Grainger Weston, developed the resort to provide maximum benefit to the local population and a venue for forward looking conferences. Grainger has been a great supporter of the Scientific and Medical Network and the organisers are indebted to him for all his help, encouragement and financial support. The SMN ran several conferences at Frenchman's Cove between 1999 and 2001. The new conference series began in 2009.

Our talks and discussions will be held overlooking the sea. There will be optional Yoga, Panneurhythmy or Qi Gong sessions before breakfast each morning. Lunches are on the beach and afternoons free to enjoy this beautiful place and its surroundings.

For more information go to www.frenchmanscove.com

ACCOMMODATION & TRAVEL

The main group from Europe will be travelling from London to Kingston on Monday 29th January returning Wednesday 7th February taking the direct BA flight from Gatwick.

The conference registration fee will be £300 for individuals and £550 for couples. Accommodation costs around \$100 a night bed and breakfast. Details on enquiry. We recommend adding a few days of holiday to the start and/or end of your visit to enjoy the beautiful surroundings.

Travel arrangements will be coordinated on registration.

The Conference is organised by Frenchman's Cove Resort in association with the Scientific and Medical Network. Persons who attend the Conference are contracting with Frenchman's Cove Resort and not with the Scientific and Medical Network.

To register, express an interest or for more information please email:
