CLASH OF BELIEFS!

New Online Course by Dr. Natalie Tobert

Exploring our beliefs about
nature of reality and health

Starting 11th January

Welcome to our on-line seminars for medical and health care practitioners, peers, and people like us. We explore new knowledge around being human and healthy in today's Global World.

This course bridges paradigms between mainstream health education and complementary practices. It is essential for us to discuss cultural and spiritual explanations for what it means to be human, in times of colonisation and a global influx of new migrants and refugees. Our intention is to address an educational gap, particularly in the field of mental wellbeing and acknowledge the clash of beliefs between those who understand health from different perspectives. See SMN website for full synopsis of sessions.
